SKILLS

Programming Languages & Tools: Java, Scheme, C, Python, JavaScript, HTML, CSS, Git, MongoDB

Design Tools: Figma, Adobe Photoshop, Illustrator, Premiere Pro

PROJECTS

Hurricane Evac   2020
Python, Flask, JavaScript, JQuery, MongoDB, Google Maps API
- Used Python and Flask to create back end for a web app recommending hurricane evacuation routes, based on user location and web-scraped hurricane data.
- Implemented MongoDB database to store and retrieve evacuation route data.
- Used AJAX requests to link front-end Javascript and API calls to back end.

Death Clock   2020 - Present
HTML, CSS, Sass, JavaScript, JQuery, Google Chrome API
- Building a Chrome extension which counts down to a user's time of death, predicted via user information and web-scraped life expectancy data.

Project Pink   2020
HTML, CSS, JavaScript, Bootstrap, Google Maps API
- Built front end and implemented Google Maps API for a web app, which crowdsources locations of free menstrual products and restrooms in an area.

The Nonymous   2019
HTML, CSS, Bootstrap, WordPress, Figma
- Created Figma mockup and developed WordPress prototype for a startup web platform, which aims to connect entrepreneurs with software developers.
